Straddle carrier	40 t
Reach-stackers	10 t
Mobile harbour crane	100 t
Stations for refrigerated containers	95

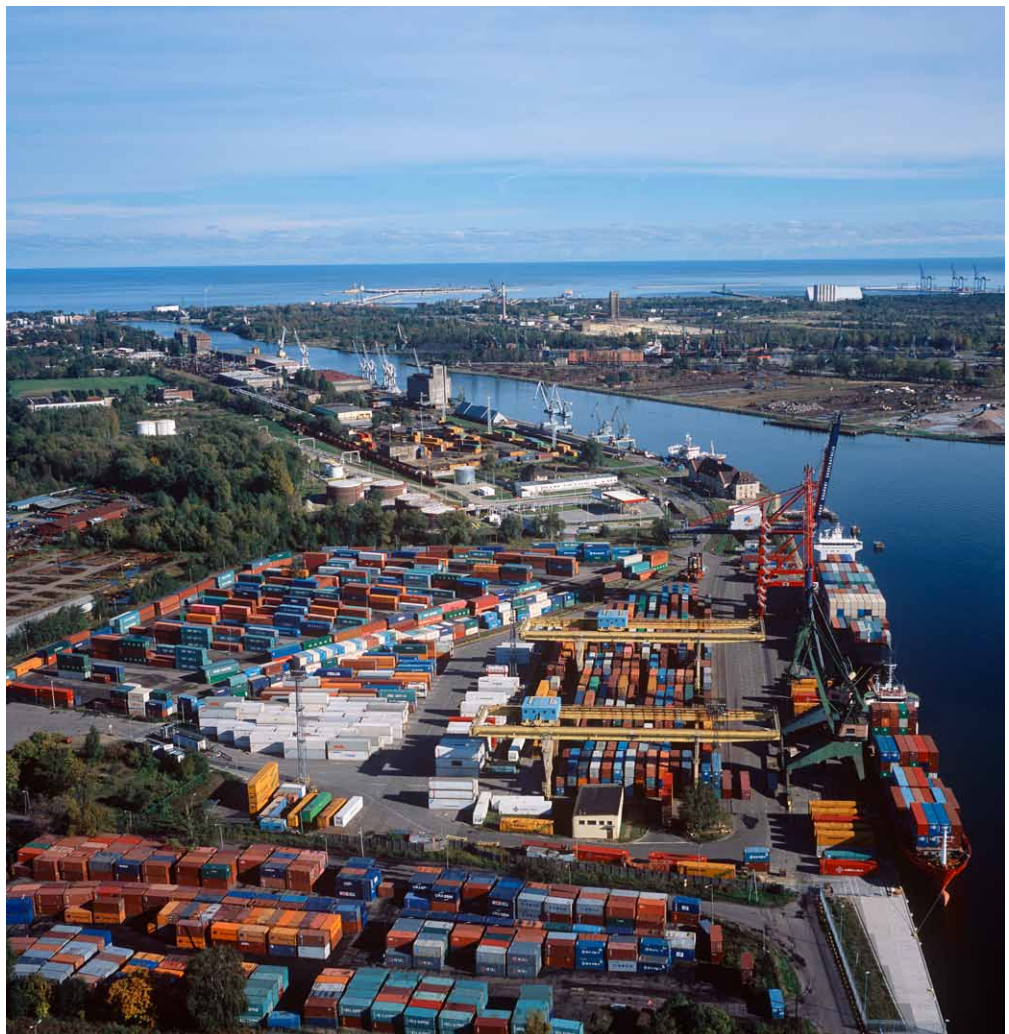

In November 1998, the Gdańsk Container Terminal (GTK) became operational at the Szczecińskie Quay. The terminal can service ships of a maximum capacity of 20,000 DWT in Lo/Lo and Ro/Ro systems. Situated on the quay, the Temporary Storage Warehouse with identification number PL322000MC0023 offers the use of the abridged procedure for container clearance.

The terminal offers the following regular feeder services:

- **Team Lines** on the routes - Gdansk - Hamburg - Bremerhaven - Gdansk calling once a week
Gdansk - Klaipeda - Hamburg - Bremerhaven - Gdansk calling once a week
Gdansk - Rotterdam - Gdansk calling once a week
- **Unifeeder A/S** on the routes - Gdansk - Rotterdam calling twice a week
Gdansk - Bremerhaven - Hamburg calling 1-2 times a week

The terminal handled 74,809 TEU sea-borne in 2009. Due to large container volume growth increasing storage capacity is planned.

The terminal is managed by the Gdańsk Container Terminal Co., whereas services are rendered by the Port of Gdańsk Cargo Logistics Ltd.
